The system may remind you of that "Found new hardware" which, however, can be ignored.

After finishing all the operations shown above, please restart the computer and launch the surveillance program. A shortcut of the surveillance program is created on the desktop.

For more help about how to operate the software, you can open the file DVR.CHM in the directory C:\QQDVR.

****The first time you use the QQDVR, remember that the software installs in a "LOCKED" state as a default, and you have to use the "user name" and "password" to unlock it, and configure it. The user name and password are both the same word "admin"...
